### Job Application for Mechanical Engineer

Dear Mr. Earle,

### About Me

I am a mechanical engineer with a zeal to advance the engineering profession through the use of technology and innovation. I do not merely accept the status-quo but actively seek out new and innovative ways to propel industry into the next era of technology and design. My willingness to learn is essential to who I am and also to the engineer I see myself becoming. I have a passion for people and the dynamics of teamwork. I explore creative avenues and learn from the expertise of those around me in order to develop optimal solutions to the problems I encounter.

### Why ESTEQ?

ESTEQ is a progressive company which strives to empower industry with the help of technology. ESTEQ is on the forefront of implementing solutions to industry that give their clients the tools in which to be competitive on a global market. Being closely linked to many international partners, such as Siemens and MSC, puts ESTEQ in the unique position to spearhead South Africa into the digital age. I have had the opportunity to work closely with many people in ESTEQ and the company is one which aligns seamlessly with my interests. ESTEQ is a place in which I can learn, grow and make a difference in. I have experienced the excellence that ESTEQ offers and this is why I want to join the ESTEQ team.

### Why Me?

I am fascinated by innovation. When I am inspired, I do more than what is expected of me. I am quick to learn and self-motivated. Technology and software are my forte and I excel in problem solving. I enjoy working in collaborative teams and creating an outcome which I would not be possible by myself. I believe that my interests and skills can make a positive impact within ESTEQ. I have gained experience in the Siemens software through training provided by ESTEQ as well as using the software on a daily basis. This gives me an advantage within ESTEQ as I already have a solid foundation and I am eager to master the skills I already possess.

Sincerely,

**Dillon M. Parfitt**
